

Getting ready for school can be challenging — but making sure your child looks his (or her) best doesn't have to be.

Cutting your child's hair is one simple way to save time, money—and have fun together.

SAVE TIME

Fit haircuts into your own schedule, not that of a barber shop or salon.

CUT COSTS

With the average haircut costing \$10 or more, a home hair-cutting kit will be paid off after three or four uses.

BE SAFE

Make sure your child is secure in his seat and use good tools. Wahl Clippers use blades that are precision-ground; avoid duller, stamped blades that can snag or pull.

BE STYLISH

Cutting your child's hair gives you the flexibility to trim when needed. Wahl Clippers come with instructions and styling guides, as well as accessories to help you give the perfect haircut.

HAVE FUN!

Giving your child a haircut can be an enjoyable time together. Capture the moment in pictures.
